Dear Winelovers!

Nearly 70 people, all of whom are wine experts, including some of the world's most respected authorities, Masters of Wine, a Master Sommelier, champion sommeliers, WSET graduates and trained wine merchants will come to Budapest this year for the second time in search of the best wines from Central and Eastern Europe. These wines will then feature prominently on the Winelovers Wine Awards results list and reach tens or even hundreds of thousands of professionals through the unique, extensive media support of the competition and its national and international partners Decanter, Wine-Searcher and The Buyer.

The Winelovers Wine Awards represent the latest generation of international wine competitions, with aims and activities that go beyond traditional wine competitions. **The competition was created to give wines from the region a real breakthrough, converting the marketing value of medals into commercial results.**

We are building a bridge between East and West, a win-win situation for winemakers, wine merchants, consumers and even ourselves. We have many plans to address the current gaps in the wine world and the needs of current players in the wine

market. The side event to the competition – Winelovers-X – Experts, Exhibition, Exclusivity – is one of the first examples of this. It also aims to create a prominent, clear and effective offline platform for professionals and committed players in the wine world to meet and do business.

We all know that it is not enough to make a product and bring it to market. Producers who enter their wines and achieve results at the Winelovers Wine Awards, and especially those who join us at Winelovers-X, make it clear by their presence that they are working actively and effectively for international results. All our support goes to these wineries and brands, with whom we can achieve the success we desire.
