Teljes körű energiaellátás nagyvállalatoknak

Az energia ára folyamatosan változik az energiapiac összetett folyamatainak függvényében, így érdemes mielőbb meghozni a vállalatok stabil működését biztosító döntéseket.

Megbízható partnerségre építve átfogó, hatékony és fenntartható üzleti megoldásokat biztosítunk vállalati partnereink számára.

Ellátásbiztonság, energiahatékonyság, fenntarthatóság - a jövő vállalatának mindhárom pillérre szüksége van a hosszú távú, sikeres üzleti működéshez. Legyen szó áram- vagy gázszerződésről, zöld megoldásokról, szeretnénk megosztani tudásunkat, hogy azt Ön is kamatoztatni tudja a jövőben.

e.on

Dear WineLovers!

Nearly 70 people, all of whom are wine experts, including some of the world's most respected authorities, Masters of Wine, a Master Sommelier, champion sommeliers, WSET graduates and trained wine merchants will come to Budapest this year for the third time in search of the best wines from Central and Eastern Europe. These wines will then feature prominently on the WineLovers Wine Awards results list and reach tens or even hundreds of thousands of professionals through the unique, extensive media support of the competition and its national and international partners Decanter, Wine-Searcher and The Buyer.

WineLovers Wine Awards represent the latest generation of international wine competitions, with aims and activities that go beyond traditional wine competitions. **The competition was created to give wines from the region a real breakthrough, converting the marketing value of medals into commercial results.**

This year we organized several side events of the competition, all in order

industry professionals and create a clear and effective offline platform for professionals and committed players in the wine world to meet, network, and do business.

WineLovers X (Experts, Exhibition, Exclusivity) has almost doubled its size with around 40 exhibitors, and this year we introduce new events (Meet the Buyers, Sell your Wines master class and Taste With the Expert) to provide even more surface for wineries enabling them to achieve international success.

Short introduction of the winery

Düne Winery, formerly known as Béla Winery, operates as a family venture nestled in Imrehegy. It was founded by Zoltán Béla, alongside his parents and siblings, back in 1991. In 2014, Zoltán Béla assumed full ownership of the winery and the majority of its vineyards, embarking on a journey of continual growth and enhancement.

Our wines are crafted exclusively from grapes harvested from our own vineyards, processed in our state-of-the-art facility inaugurated in 2012. Employing both innovative must cooling technology for reductive wines and traditional fermentation methods for our red and late harvest wines, we ensure each bottle embodies our dedication to quality and tradition.

Short introduction of the winery

Attila Biro is the 4th generation of our winemaking family. The Biro & Son family winery has been operating in the same cellar since 1880, now on 7 hectares. Our red wines made only from our own grapes, hand-harvested, organically cultivated in Eger only from grand superior vineyards. Traditional winemaking using steel tanks, Hungarian and French barells. Our motto: 7 ha, 9 vineyards, 140 years of experience.

Short introduction of the winery

With the 22-year history of the Kovács Cellar behind us, in 2019 we appeared on the market with a new image, under the Cardium brand name, with light, fresh, reductive white and rosé wines made by our new winemaker Balázs Monostori, rich in fragrance and flavor. In 2019, we also started to spread our wings in the world of sparkling wines and champagnes.

Short introduction of the winery

The family winery and vineyards are located in southern Slovakia, above the village of Vinica and below the volcanic mountain of Guard. Karol Csernus, together with his son Karol junior, produces wines with a harmonious taste and playful acidity, with a special salty mineral character that reflects the volcanic soils. All this is based on gravity processing of the grapes and natural yeast fermentation. The family has lived in Vinica for generations, for over 400 years, and their ancestors have been making wine from the very beginning, something they are very proud of.

Short introduction of the winery

Welcome to the EGERSOUL Winery! Első Szőláti Borház proudly introduces its wines under the brand name EGERSOUL. Starting from the summer of 2022, customers can choose already from a range of six products. The company is committed to showcasing the unique local characteristics, exclusively cultivating grape varieties traditionally found in the region that are perfect for the local soil. The vineyards cover a total area of 20 hectares. The owner represents a simple, clean and natural way of thinking which is reflected in the graphics of the bottles already on the market. This ethos will extend to the architectural style of the soon-to-be-built winery. The historical slopes of Egerszólát are embraced by the harmony of nature, while the carefully tended vines reward this care with wines of unique flavours.

Short introduction of the winery

Our winery was founded in 2021 in Tállya which is part of Tokaj-Hegyalja historical wine region. At the moment we farm on 2 hectares from which we make our wines.

Our vineyards are located on the border of Tállya and within the area they are set on highly rated territories. We grow the two emblematic grapes of the wine region, furmint and hárslevelű on our vineyards, they are approximately distributed in the proportion of 65-35%.

We believe that an area with outstanding features is not enough to make wine, but that quality wine can only and exclusively be made from highest quality grapes. To achieve this we apply strict yield restrictions and seasonal cluster selection in our vineyards.

Winemaking takes place in modern steel tanks, preceded by manual harvest. We apply gentle press on the grapes and then ferment our wines using controlled technology. Depending on the vintage, we keep our wines on fine lees for 4-6 months, thereby creating a kind of balance between the body and freshness of the wine. We consider it important to also show the new-wave, "young" face of the Tokaj-Hegyaljai wine region.

Short introduction of the winery

The Fekete Wine Cellar is located in the heart of the Iván-valley, one of the most valuable areas of the Szekszárd wine region. The cellar has been founded in 1961, and it operates as a family enterprise. The Kerék-hill, Decsi-hill, Görögszó-hill and Nagy Mihály-valley vineyards, owned by the winery possess extraordinary quality. And after all grape is the soul of wine. Preserving the ecosystem and biodiversity of the lands belonging to the winery during the farming process is a key issue for the winery. It uses the 600 years old traditional manual pigeage techniques of the Szekszárd wine region (open fermentation tanks, hand pigeage and hand maceration, for kadarka new oaken barrels are never used for aging) supplemented with modern equipment and procedures.

Short introduction of the winery

We are first-generation winemakers, where nothing is set in stone, therefore we focus on respecting old traditions and tailoring them to modern needs. Sustainability and organic winemaking is crucial for our vision, aiming to intervene as little as possible throughout the process. As a family winery, a lot of the work is done by two of us, and the name of the winery reflects this. The values that are important to us - purity, honesty, authenticity - are present in our wines, as well as the characteristics of the region.

**JAMMERTAL
BORBIRTOK**
VILLÁNY

Short introduction of the winery

Recognizing the rare lucky features of the Villány wine region, the development of the Jammertal Wine Estate began in 2001. Today, the estate have become one of the most important red wine making workshops in the world.

At the Concours Mondial de Bruxelles 2021 wine competition, their Cassiopeia Merlot 2015 achieved the highest score among all the submitted red wines in the world. This result has not only proven the merits of Jammertal Wine Estate but also indelibly placed Villány on the map of the world's elite red wine regions.

The production of consistently internationally highly recognized red wines takes place in a winery that is perfectly equipped and meets the highest standards. Their grapes come from excellently located, very nicely maintained vineyards.

WINERY KANCELLÁR BIRTOK KFT

Wine region	Somló
Vineyard size (ha)	22
Winemaking style	Traditional
Current export markets	China, Korea, EU
Main grape variety/ies	
Contact	Gyula Bertalan, Head of Marketing +36702765268 bertalan.gyula@kancellarbirtok.hu
Web	kancellarbirtok.hu
Social	facebook.com/kancellarbirtoksomlo

Short introduction of the winery

The Kancellár Birtok is one of the youngest wineries in the Greater Somló Wine Region. Ferenc Horváth, Chancellor of the Somló and Environs Wine Route Association and Order of Wine Knights, together with his family members, launched the wine estate of Somló and Its Surroundings in 2014, which were then 11 hectares, now cultivating grapes on 22 hectares and producing characteristic wines from Somló.

Making Somló wine should only be done responsibly. We are committed to the place of production, the terroir. In addition to the geological, climatic and other conditions, we believe that terroir includes the respect and rich experience of the people who work here.

Our goal is to create and further develop a vineyard and winery based on the traditions of Somló, combining it with modern technology, but preserving naturalness.

Our vineyards span the slopes of the mountain from southwest to north-east in renowned vineyards (St. Helena, Ragalja, Séd, St. Martin) in excellent locations. From our "old" vines we harvest Juhfark, Hárslevelű, Furmint and Olaszrizling bunches. Our newly planted Irsai Olivér, Cserszegi Fűszeres, Kékfrankos and Cabernet Franc grapes will yield a pre-grape harvest in two years. In our cellar there is 1.100 hl of fermentation storage space with refrigerated and heated steel tanks. We currently use reductive winemaking technology. We fill, seal and label our wines locally, on our own bottling line. We are increasing our storage capacity, expanding it with a fermentation and ripening cellar with wooden barrels. We built a new grape processing area, a bottled fermenting and finished goods warehouse.

WINERY

Short introduction of the winery

KÁLDI is a small boutique winery, with a history of only a few years, in which the owner Gergő Káldi's passion for wines and desire to create, experimental spirit and curiosity take shape. He carries out the viticulture and winemaking works with external help, but mostly himself, his constant caring attention and presence, and the striving for the best quality can be seen in action in the wines.

"I don't care about the quantity; I'm looking for the miracle and I want to create the beautiful and I hope that one day I will succeed."

Until now, Gergő has mostly gained experience in the field of making full-bodied, complex red wines, this year he is also looking into the world of white wines of different styles.

He absolutely did not start from the world of winemakers, perhaps that is why his wines can

Short introduction of the winery

Short introduction of the winery (5-6 sentences in English): The winery was founded by Gábor Matyisák. His main goal was to create an artisanal family winery, which can show through the wines, the traditional values of Tokaj without any compromises, craft premium wines. The handcrafted style in their wines is enforced through the fact, that they use szerednyei barrels, which are made in their own cooperage, so they can create an even better and recognizable unique style. Our aim is to craft Tokaj wines, which can show the traditions and at the same time have unique flavours and share a unique style.

Short introduction of the winery

It is no coincidence that their motto is “From special to unforgettable”. The creative work of founder János Pécsinger Sr. is still guided by respect for tradition, love of family and humility towards the land, which is interwoven with the dynamic and innovative approach of his son, János Pécsinger Jr. In twenty years, the family has built a dominant winery in the wine region of Pannonhalma, which is based on 80 hectares of grapes.

Short introduction of the winery

Seen from above, the landscape looks like a lot of green dotted with only three parallel roads intersected by two others, all at a great distance from each other. Between them there is only vegetation, and on closer inspection, one area catches the eye with the symmetry of rows of vines neatly aligned in parallel rows. A small orchard separates the vineyard from the winery. On the ground, access to the property is through the red brick pillars of the gate; looking to the right - a house with the personality of the old and undefeated ones; looking ahead there's the vineyard in all its splendor - there are 3.13 hectares in the heart of the D.O.C. wine area Miniș/ Crișana. Cabernet Sauvignon is grown here in a sustainable viticulture system (the organic certification process of the plantation and the wine started in 2022). The grapes are vinified as mono-cultivar and the winery owns vintages over ten years old from grapes harvested from 35-50 year old vines.

Wine has been made in Birăuș since 1801, at that time under the name Domeniile Josef Domany, official supplier of the Imperial Court in Vienna which acquired this status of K.U.K. Hoflieferant in 1899 in Vienna. Active since 2002, the property owns the most valuable part of these former estates, three cellars and part of the former wine estate. The vine takes over the domain not only in the places assigned to it, but also around the corners of the house, hugging old wooden shutters, winding up to the eaves. Along with the dwarf stone fences that separate the areas and the wooden posts that support the heavy red tile roofs, the wind blowing through the heavy bunches tells the story of a life fulfilled by passion and work in nature.

The wines from Miniș were awarded in London (1862, 1876) and Budapest (1875, 1884) and have not lost their value even today, receiving awards and an average rating of 3.8/5 on Vivino. They have aging potential as they are aged in French oak. In addition to the winery and the necessary wine equipment on the property there is also a mini-distillery (column distillation boiler with Christian Carl plates) making high-quality distilled products from wine and pomace ("Grappa") and a special fortified wine ("vin de walnuts").

Short introduction of the winery

Préselő Winery is a boutique wine estate founded in 2013 in Erdőbénye village in the heart of Tokaj wine region. Vineyards are located around the village spreading over more than 5 hectares, where grown three typical Tokaj's varieties of Furmint, Hárslevelű, and Muscat Blanc grapes. In vine cultivation mostly sustainable and biological methods are used to achieve clean and healthy products with long aging potential. Current production is approx. 15.000 bottles per year. Préselő's individual style provides elegant, crispy wines perfectly fit to both high end gastronomy and broad range of social events. Beside still dries and Tokaj sweet wines, sparklings as Frizzante and Methode Traditional are produced as well.

Steigler
PINCE

Short introduction of the winery

In our creed, the wine that really works and lives is made of grapes grown under truly environmental friendly conditions without using chemical fertilizers, toxic or synthetic material.

Our winery rests on the shoulders of two charismatic people, the owner, Lőrinczy Bálint, and the estate manager, Varga Tamás, both considering the trinity of naturality, traditions, quality as their main mission. The grapes for the wines, produced in outstanding quality by Steigler Winery is ensured by its own, organic vineyard of 21 hectares. The vineyard is located in the sites named Steigler, Frettner and Sporn Steiner in the best areas of the Sopron wine region. The basis for the plantations is provided by Green Veltliner, Zweigelt, Blue Franc, Pinot Noir, Merlot, Cabernet Sauvignon, complemented with the newly planted Cabernet Franc, Syrah and the „Crown Jewel“, Furmint. Steigler Winery can be found in the heart of the Poncichter neighbourhood, in Balfi Street, at the outskirts of downtown Sopron. The cellar system, carrying all local characteristics was carved out under dwelling-houses several hundred years ago

Short introduction of the winery

Inspired by the glorious story of our founder, György Streit's ancestor Zágonyi, our new wines are light, fresh and full of verve.

Our Winery was founded in 2013. The current size of our vineyards is 9 hectares. We grow cabernet franc, cabernet sauvignon and merlot on 70% of the area. 1.5 hectares are devoted to blue franc, half a hectare to syrah and the remaining areas to chardonnay and lime and portugieser. The majority of the areas are located in Siklós on the Városhegy, with the remaining plantations in Villány in the Jammertal area.

We are building a new processing plant in Villány on Oportó Street, 85% complete. When completed, it will be the first winery in Hungary to be fully powered by renewable energy. We plan to integrate more vineyards after the building is handed over.

The current annual number of bottles is 50,000, the planned number is 300,000

Short introduction of the winery

The winery is a Chateau type winery, our estate center is located in a small castle north of Szekszárd, on the Szent Gaál vineyard near Zomba. The castle has a baroque atmosphere, surrounded by a 3.5- hectare park, and its outbuildings are home to our winery. We work on 41 hectares. Our vineyards are

located in three areas, in excellent locations. Our owner has been managing our wine house since 2011. Our creed is to fill the bottle with fruity, drinkable wines that fit the values of Szekszárd. We sell the finished wines in retail chains primarily, nearly 200,000 bottles a year.

Short introduction of the winery

The Szűcs Winery has been vine-growing in Tállya, one of the beautifully situated settlements of Tokaj-Hegyalja, considered a UNESCO World Heritage Site, since 2012, where they have been making wine for hundreds of years in the area surrounded by volcanic mountains.

In the course of our work we strive for organic approach in order to produce high-quality raw materials. Our vineyards (Bohomály, Hasznos, Mulató Patócs, Somszög, Tökös-mály), located in historic first-class vineyards, have organic certification, and we cultivate the vines with a lot of handwork, with significant crop restrictions.

From the very beginning, our goal has been to produce wines that are as natural and unique as possible, specific to the landscape and the microclimate. We want to show the characteristics of the vineyard, the grape variety, and the vintage. We do not use special yeast, enzymes or other additives, after a short fermentation in steel tanks, the wines are aged in oak barrels, and some of our batches are aged in ceramic eggs.

The majority of our wines are made from furmint grapes, a smaller part from lime-leaf grapes, our main product is dry white wine, but we also continue the world-famous sweet wine-making tradition of the wine region, which has survived for centuries: we still harvest the aszú grapes for aszú wine by hand, one berry at a time. We also use traditional methods to make sweet dry szamorodni when the weather is kind to us.

Short introduction of the winery

Tokaj Art Wine – Wines Wine as Art The Tokaj Art Wine winery produces iconic wines from the Tokaj wine region to an exceptionally high quality. From the grape varieties of Tokaj-Hegyvidék, Furmint and Sárgamuskotály, we mature our Tokaji Aszú, furthermore, our late-harvest and sparkling wines. We also produce a unique Tokaj champagne. We invoke mystical processes to make our Aszú: when cold nights follow warm days and humidity is ideal, a magical coating forms on the grapes. If nature has been kind and the magic has happened, after harvesting the Aszú berries, the dried, wilted fruit, with its extremely high sugar content, is left to mature in oak barrels for 18 months. Another legend of the region is called Szamorodni. The grapes are harvested at the beginning of the drying process, then pressed together and finally matured for 6 months. With each sip, enjoy the refined flavours of Tokaj wines, which are a worthy representation of this special region.

Short introduction of the winery

Short introduction of the winery (5-6 sentences in English): Our winery is located in Tarcal, we farm 42 hectares in our plantations on the border of Tarcal and Mád. Our winery was founded by its previous owner in 2002, when the Mediterranean-style wine house and the cellar equipped with modern technology were built. Our current owner has been running the winery since 2007, we sell more than 250,000 bottles of wine reflecting the values of the Tokajhegyalja every year, which reach discerning wine consumers through domestic and foreign retail units.

Short introduction of the winery

Making wine, building a winery and bringing it to success is not simply a business – it is a passion, an integral part of your life. We have been producing grapes and making wine on Somló since 1946. The Tornai Winery started with the momentum of the post-war rebuilding effort, and decades of continuous construction have made it one of the most significant family estates of Somló Wine Region and Hungary.

Short introduction of the winery

Túzkő Estate is located in Hungary, in the small municipality of Bátaapáti, nestled in the gently rolling hills of Tolna wine region, 150 kilometers south of Budapest and 30 kilometers west of the Danube River. Túzkő Birtok is one of the oldest wineries in Hungary. Our production philosophy aims at achieving the best expression of each grape variety by single varietal winemaking, both white and red grape varieties. Túzkő is on the border between Szekszárd and Tolna, two of the four regions that comprise the Pannon Wine Region, located in southern Hungary. The hillsides, lakes and valleys create distinctly different microclimates and an incredible variety of terroirs.

Short introduction of the winery

The Villa Gyetvai Winery is housed in a classical villa surrounded by a park with ancient trees in Balatonfüred. The vineyards are located in the vicinity of Paloznak, Aszófő and Tihany. The winery's portfolio ranges from elegant white wines with a focus on fruity flavours, through exciting Schillers and serious reds, to a selection of pálinka (i.e. brandy). Traditional Upper Balaton grape varieties such as Olaszrizling, Furmint and Kékfrankos play an important role, but the winery is also experimenting with some personal favourites such as Riesling, Chardonnay and Syrah.

Short introduction of the winery

In 2009 László Kovács has made a dream come true for his family when he established his winery called Vinatus located in Villány. He sees opportunity in the town and intends to promote Villány wine region further. This is how Vinatus became the name of the winery, which is the old Latin name of Villány. László visited Villány for the first time in 1996, and good friendships came from this time, which has strengthened him in the thought of planting grape in Villány wine region. He is dealing with viticulture and wine culture since 2002. He bought his first land in 2005 near Kisharsány. First harvest from the land of 8 hectares was in Autumn 2009. Wines from that year won more domestic and international gold medals. Next piece of land has been bought near Kistótfalu with which the Family now owns a land of 30 hectares. On the land near Kisharsány only the well proven type of grape are there such as Kékoportó, Merlot, Cabernet Franc, Cabernet Sauvignon and the Syrah.

Short introduction of the winery

Vinea Apoldia Maior is the name of the wine research station of the University of Agricultural Sciences and Veterinary Medicine Cluj-Napoca, one of the oldest universities in Romania and, at the same time, one of the most prestigious universities in the field of life sciences in the country. The wines from Vinea Apoldia Maior combine the long local tradition and the modernity of vine cultivation with the specificity of soils and unique microclimate conditions, the refinement of special clones of noble varieties, and the science and love with which they were produced and assembled by oenologists. The wines produced in Apoldu de Sus have been known and appreciated due to their freshness, fruitiness, refinement, and richness of flavors, enhanced by a higher acidity.

Short introduction of the winery

The Vylyan estate is located in the Villány Wine Region, the most famous Hungarian red wine producing area. This land has the highest sunshine duration in the country. The east-west orientation of the Mecsek mountain range protects it from cool northern winds. The loess and clay topsoil on the limestone bedrock is absolutely ideal for viticulture. The wines made here unmistakably bear the typical Villány characteristics.

In addition to special characteristics of the terroir, the most important factor is the Vylyan staff.

The commitment, knowledge and hard work of this team makes the wines unmistakably Vylyan.

Short introduction of the winery

Located in the most beautiful vineyards of the Tokaj Region, the 30-hectare estate was founded in 1991 by Count Aladár Zichy. We have since renovated the vineyards and modernized the cultivation process and continue to look after our heritage with a focus on preserving its natural values. We started making sparkling wine Méthode Traditionnelle in 2019. The terroir's typical cépage, Furmint, provides the structure and the freshness, while our selection of Muscat Lunel grapes adds elegance and a rich fruity flavour. The unique composition of volcanic rocks of the terroir lends our sparkling wine with a mineralish finish so typical of Tokaj. "Champagne and sparkling wine is part of our family's everyday life..... and not just because of our work. "We love sparkling wine ourselves, we love sharing it, and love the mix of elegance and lightness that our products bring. Our aim is to reach people who are looking for good company, high-standard activities, a unique look and feel, people who are themselves bubbly and energetic, who think in terms of quality. They will buy our sparkling wines for themselves or for their friends, they will also recommend them for events, ask for them at the theatre interval, open them at their wedding, christening, graduation, birthday party!" Countess Anna Zichy

Short introduction of the winery

Wine maker Kata Zsirai is Hungary's Young Wine Maker of the Year for 2018 and she has run the estate with her sister Petra since the death of their father Csaba in 2011. The family's 16 hectares of vineyards are in Tokaj from which they harvest their total production by hand. They only produce wine from the grapes that they grow and believe that the secret of good wine is excellent soil, proper selection of grapes varieties, and diligent care.

Wines of Ukraine

Ukraine boasts a variety of terroirs, extending from the south to the north and from the east to the west, catering to every imaginable wine style. Winegrowing and winemaking have long been integral to our national culture.

Wines of Ukraine in numbers:

2,800 YEARS OF WINEMAKING HISTORY

30,2 HA VINEYARDS (excluding temporarily occupied territories, due to the lack of reliable data regarding the condition of vineyards there)

160 WINERIES

200 GRAPE VARIETIES

45°-52° NORTH LATITUDE

66 MLN LITERS ANNUAL PRODUCTION

NO LIMIT FOR EXPERIMENTS

Currently, Ukraine is embarking on a new historical journey that encompasses the search for lost terroirs, the rediscovery of indigenous grape varieties, experimentation with new technologies, and the reevaluation of traditional wine production methods. The full-scale war initiated by Russia has profoundly impacted the industry. Numerous wineries have been occupied, others have suffered damage and looting, and several vineyards have been mined and abandoned. Nevertheless, we continue our fight!

In recent years, Ukrainian wines have achieved remarkable success on the international stage, securing numerous awards and earning recognition from the most prestigious wine challenges and critics. We are increasing global awareness, and today, Wines of Ukraine are available in various countries, including the UK, USA, Japan, Poland, the Baltic states, and Nordic countries, etc.

Short introduction of the winery

46 Parallel Wine Group is a Ukrainian family company established in early 2020. Their mission is to become Ukraine's business card in the world's wine industry. The company's wines are created exclusively from Ukrainian grapes, which are born on the 46th parallel in the South of Ukraine. The unique climate and terroirs of Ukraine's 46th parallel enable them to create fine wines of the highest quality.

46 Parallel is a brand which includes two premium wine collections – Grand Admiral and El Capitan. Both collections are produced in limited volumes with each bottle having its unique number.

46 Parallel Wine Group has won more than 100 awards at domestic and international tasting competitions. The company's registered slogan says "Proudly Ukrainian!"

Short introduction of the winery

Big Wines is a young and ambitious Ukrainian winemaking company launched under the umbrella of Vinos de La Luz, a big winemaking group which has production facilities in Argentina, two DOs of Spain, Italy (Tuscany) and the USA (California). The company was founded in 2019 by a Ukrainian wine enthusiast and sommelier Natalia Burlachenko and an Argentinian winemaker and businessman Ricardo Núñez. Big Wines philosophy is part of the large Vinos de La Luz family, created by Ricardo Núñez, which is known for its careful attitude to the terroir and vines.

The company's first wine, BIG WINES BIG ART 2020 Ivan Marchuk limited edition, was released in February 2023, and has already won several prestigious awards from the international contests, including gold medals from Mundus Vini 2023, Berliner Wine Trophy 2023, and Cervim-Viticultura Eroica 2023.

Big Wines is a company with a unique concept that combines Ukrainian resilience, perseverance and love for the native land with international experience, traditions and sustainable approach. Big Wines grow international grape varieties, as well as the indigenous and local varieties, producing the wines that demonstrate the unique features of Ukrainian terroirs. Some wines are also aged in Ukrainian oak barrels.

Web	biologist.com.ua/en
Social	facebook.com/biologist.wine.club

Short introduction of the winery

Biologist Winery is based in the village of Lisnyky near Kyiv. For several years, they have been practicing organic and biodynamic methods of viticulture and winemaking. Biologist wines are produced with minimal interference, spontaneous fermentation and strict temperature control. The winemakers are also using gravitational technology.

Biologist Winery owners have two plots of vineyards in Lisnyky and Bezradychy, in Kyiv region, as well as one in Odesa region. To increase the immunity of the vine and soil, the Biologist winegrowers avoid using artificial chemicals, such as herbicides and pesticides, while using natural herbal and mineral preparations instead. Their plots can boast a remarkable collection of grape varieties. You can find international grapes like Pinot Noir, Cabernet Sauvignon, Grüner Veltliner, Müller-Thurgau, Weissburgunder (Pinot Blanc), Gewürztraminer, Riesling, Chardonnay, Aligote. As well as famous Ukrainian indigenous grape, Telti-Kuruk, which, until now, has been grown only in the south of Ukraine, in Odesa and Mykolaiv regions. Sulfites are used very moderately. Most wines undergo long maceration (6-10 days) with the addition of dried cluster stems. Some wines are made with spontaneous fermentation.

Social	@chizaywine

Short introduction of the winery

Chateau Chizay was built in 1995. It has a deep connection to the local ancient winemaking tradition, being built at the place of a historical winery from the 17th century in the middle of a winemaking valley named Chizay. The historical region of Zakarpattia (Transcarpathia) is located in Western Ukraine, in the area of the Carpathian Mountains where Ukraine borders Hungary, Poland, Romania and Slovakia. Here the mild sunlight is wonderfully combined with optimal rainfall amount, and the Carpathian Mountain landscape protects the vineyards from northern winds. The soil, full of minerals, adds unique aromas and taste to the grapes, producing the wines with a very special terroir character. Chateau Chizay owns 272 hectares of the most beautiful and well-kept vineyards, as well as a modern wine making complex consisting of an up-to-date winery, a wine-tasting hall, a museum of wine history, a nice restaurant and a mini hotel.

Traditional and kosher wines by Chateau Chizay are exported to the United States, Canada, Japan, Israel, UK, China, Nigeria, Hungary, Poland, Estonia, Finland and other countries.

Short introduction of the winery

CHATEAU PINOT is a craft family winery with a complete production cycle: from vineyard to bottle. The winery's name is determined by the fact that we exclusively grow grapes of the Pinot group - Pinot Blanc, Pinot Gris, and Pinot Noir. We produce quality local Ukrainian wine using modern European technologies. The vineyards were planted in 2014, and the winery was built in 2019. The first release of our wines was planned for 2022, but due to a large-scale invasion, it was postponed, so it took place only in 2023. Our winery is located in the south of the Odesa region, in one of the best Ukrainian winemaking regions – the Danube Bessarabia, in the Izmail district, in the village of Ozern. Winemaking here is an ancient tradition dating back to the time when Greeks and Thracians first discovered these fertile lands. CHATEAU PINOT wines are made from grapes grown on the slopes of the largest freshwater lake in Ukraine – Yalpug.

Short introduction of the winery

Until 1946, the Palariev family lived in the Moldovan village of Frumushika-Nova, where they had successfully developed winemaking traditions. In the spring of that year, the Soviet authorities repurposed the areas of Frumushika-Nova and five neighboring villages into military training sites, forcing the residents to leave their homes. In the summer of 2006, Alexander Palariev began constructing the “Frumushika-Nova” Ethnographic, Rural Green Tourism, and Family Recreation Center on the site of the former military training ground and the previously destroyed villages, reviving the historical traditions of family crafts. Today, the modern “Frumushika-Nova family winery” produces more than 35,000 bottles of wine annually

- 10 hectares of vineyards
- 5291 vines per hectare

instagram.com/kolonist_wine

Short introduction of the winery

Kolonist Winery is a family estate situated in a famous Ukrainian wine producing appellation – the Danube Bessarabia (Odesa region). The 33 hectares of vines grow on loam soils rich in minerals, with deep layers of lime. Low yields, manual harvesting, unique terroir with perfect climate conditions combined with modern equipment from France, Germany and Italy and the traditional French 100-year-old oak barriques gives the Kolonist a right to be proud of its high-quality wines.

Kolonist Winery was founded by the Plachkov family in 2005. The initial production capacity was 30 000 bottles, which has grown up to 300,000 bottles per year. The winery produces dry steel tank and oak aged wines, semi-dry and dessert wines, as well as Bisser – a Methode Traditionnelle sparkling wine. Kolonist makes oils from grape seeds, two types of balsamic oil, and cosmetic oil.

Web	mywine.com.ua
Social	facebook.com/my.wine.by.ego instagram.com/my_wine_by_ego

Short introduction of the winery

Tiras Winery, producing wines under the My Wine by Eduard Gorodetsky brand, is located in the unique picturesque area of the high, steep eastern bank of the Dniester estuary in the village of Roksolany, Odesa region. This area is famous due to the ancient Greek city-state of Nykonion, which was founded here in the VII-V century BC. The Greeks produced wine in this land 2500 years ago. Sadly, this heritage has been completely lost. Inspired by the region's glorious history, founder and winemaker Eduard Gorodetsky, who comes from the family of winegrowers and winemakers of several generations, decided to revive its winemaking traditions.

Gorodetsky makes wines from grapes that grow in Bessarabia, Izmail and Bolgrad regions: there's a lot of sunshine there, and the grapes ripen best. Varieties: Pinot Noir, Pinot Blanc, Chardonnay, Cabernet Sauvignon, Merlot, Riesling and the famous local red – Odesa Black.

Awards: my Sparkling Wine Rose Brut - Platinum medal from Ukraine Wine&Spirits Awards 2023. Chardonnay and Rose Brut represent Ukraine at La Cité du Vin museum in Bordeaux.

Short introduction of the winery

Sass K. Winery is located in Zakarpattia in the historic Berehovo wine region, in the village of Kidyosh. The multi-generational family winery has been welcoming guests and bottling wines since the early 2000s.

Vineyards are located in the Hazanéző, this area has a volcanic base and a clay upper layer. Some of the vines growing here are over 60 years old. In 2019, 2.3 hectares of newly planted vineyard was added to the existing 8 hectares.

The Sass team is focusing on growing indigenous varieties of the Carpathian Basin. The main grape varieties here are Welschriesling, Bakator, Király Leányka, Hárslevelű, Cserszegi Fűszeres and Serimi Zold, as well as such international grapes as Cabernet Sauvignon and Saperavi.

The winery was founded by winemaker Carlo Sass. Currently, he makes his wines together with his grandson, Krisztian Sass. The basis of Sass philosophy is to grow grapes and make wines with as little intervention as possible. Through spontaneous fermentation, a combination of modern and traditional technologies and experiments, they try to make wines that can show that Kidyosh is one of the best winemaking microregions in Zakarpattia.

Production capacity: 30 000 bottles per year.

WINERY VILLA TINTA

Short introduction of the winery

Villa Tinta is a family estate founded in 1998 and located in the village of Oksamytny, in Danubian Bessarabia. Villa Tinta is the company's flagship wine brand, while they also produce Charmat sparkling wines under the brand name of Tintarella. The Villa Tinta vineyards grow in the unique plots of the Danubian Bessarabia, the shores of which are washed by the Karakurt river on one side and lake Yalpus on the other side. The vineyards covering 517 hectares grow French and Italian white varieties produced from European clones – Chardonnay, Pinot Grigio, Riesling, Sauvignon Blanc, as well as red varieties – Pinot Noir, Merlot, Cabernet Sauvignon, Bastardo and the famous Georgian Saperavi. The winery's signature wines are produced from local grapes: Sukholymansky (white), and Odesa Black (red). These varieties are unique and very important for the region.

The winery has a full production cycle: from growing grapes to wine bottling. Current production capacity is 300 000 bottles per year, with the potential of up to 1 mln per year. Villa Tinta wines are bright, rich and beautifully demonstrate the unique terroir of Ukrainian Bessarabia.

The products of Halimba Crystal combine the elegant, modern design with traditional mouthblown technique. So it's not surprising, that the brand of Halimba Crystal has been connected with this high quality leadfree crystal product crafted by hand in the manufactory. Our collections are designed in sense of elegance and fine lines: the thin rims, the long, graceful stem and the light weight are, what give you the speciality of our products.
